How to add works from ResearcherID to ORCID

Step 1. Log in to your ResearcherID in http://www.researcherid.com/

Step 2. Link ResearcherID to ORCID by clicking Get or associate an ORCID

Step 3. Click I already have an ORCID record (or I would like to create an ORCID record if you have not created one yet.).

Step 4. ORCID pop-up log in page will appear. Sign in to ORCID or alternatively create account.

Step 5. Click "Authorize" to allow ResearcherID to add publications to your ORCID profile.
Step 6. Add publications from ResearcherID to ORCID

Both biographical information and publications can be exchanged between your ORCID and Researcher ID accounts.

- Choose "Send ResearcherID publications to my ORCID account", if your ResearcherID profile is more thorough than your ORCID profile;
- Choose "Retrieve ORCID publications into my ResearcherID account", if you have already added publications in ORCID (e.g. integrated with Scopus).

In this example, we select the first one - to push publications from ResearcherID to ORCID.

Step 7. Select the works to be sent to ORCID

The record(s) has been sent to your ORCID profile.
To further edit the publication information in your ORCID profile, click "Make a copy and edit" button and make changes. Note that the original imported record cannot be edited in ORCID.
